

Dear Hiring Team,

I am writing to express my interest in the teaching position at your institution. I have a Master's degree in Computer Science from the University of Geneva, Switzerland, with several years of experience in software engineering, customer and administrative support and technical problem solving. Throughout my career, I have mentored peers, explaining complex technical concepts, and helping others build confidence in their technical abilities.

My experience working on real-world software and security projects allows me to bring practical insights into the classroom. I aim to make lessons engaging, structured, and relevant to real-world applications so that students not only understand concepts but also learn how to apply them effectively. Through my education and professional experience in software engineering, I have worked with modern administrative and programming tools, security practices, and industry-standard workflows. This allows me to bring practical, real-world perspectives into the classroom and help design curriculum aligned towards industry standards.

Additionally, I hold a **Colorado Community College System (CCCS) Postsecondary Information Technology Teaching Credential**, qualifying me to teach Information Technology at the postsecondary level and reinforcing my passion for mentoring, technical instruction, and workforce development.

I would welcome the opportunity to contribute my technical knowledge, enthusiasm for teaching, and commitment to student development to your institution. Thank you for considering my application.

I am permanent resident of Colorado Springs and live within driving distance to the campus.

Kind regards,
Prasad Koshy Jose
