

Dear Hiring Manager,

I would like to apply for the Network Administrator position at Pikes Peak State College. As a software and cloud engineer with more than five years of experience supporting enterprise systems at Oracle, I have developed a strong foundation in systems administration, networking, cloud infrastructure, and production support. I am also a current contractor with Pikes Peak State College and hold a Colorado Postsecondary Information Technology Teaching Credential through CCCS, giving me a strong appreciation for the college's mission and community.

Throughout my career, I have worked with enterprise environments spanning Oracle Cloud Infrastructure, Azure, AWS, and Google Cloud Platform. My responsibilities have included administering Linux servers, troubleshooting network connectivity issues, configuring cloud infrastructure with Terraform, supporting CI/CD pipelines, managing application deployments, and diagnosing issues involving DNS, firewalls, SSL/TLS, REST APIs, VPN connectivity, and authentication. I regularly collaborated with infrastructure, database, and security teams to maintain reliable, secure, and highly available enterprise systems.

Although my background has focused on enterprise applications rather than dedicated network administration, networking has been a core part of every role I have held. I am comfortable analyzing logs, resolving connectivity issues, supporting Windows and Linux environments, documenting infrastructure, and quickly learning new technologies. My experience working across cloud and on-premises environments has given me a strong understanding of how networks, servers, applications, and security work together to support business operations.

I am particularly excited about joining Pikes Peak State College because it combines my passion for technology with my commitment to education. I would welcome the opportunity to contribute my technical expertise, collaborative approach, and dedication to reliable IT services while supporting the students, faculty, and staff who rely on the college's technology every day.

Thank you for your consideration. I look forward to the opportunity to discuss how my background can contribute to the continued success of Pikes Peak State College.

Sincerely,

Prasad Koshy Jose
