

Dear Hiring Team,

I am writing to express my interest in the position of Project Manager I, Data & Technology Services. I am a software professional evolving toward product leadership, with experience planning and delivering secure, scalable applications with AI, supported by a Master's degree in from the University of Geneva, Switzerland.

In my latest role at Oracle, I led development of enterprise-grade systems where security, reliability, and data protection were foundational requirements. I have contributed to core platform features involving secure data modeling, cloud integrations, and metadata-driven frameworks. In my previous experiences, I regularly took on leadership and mentoring responsibilities by supporting junior engineers, reviewing code, sharing best practices, and helping teammates troubleshoot complex technical issues. I collaborated closely with product managers, architects, QA engineers, and developers to facilitate design discussions, and ensure smooth team functioning. I also promoted Agile practices through sprint planning, technical reviews, and knowledge sharing, fostering an environment focused on continuous improvement.

Earlier in my career, I worked across web platforms, hybrid applications, and fault-tolerant systems, which gave me a strong appreciation for designing resilient software in real-world environments.

I genuinely enjoy working at the intersection of technology and people. Over time, I found that I am most engaged when I am understanding real customer problems and translating them into technical solutions. I believe this is a role where I can combine my technical depth with communication, ownership, and customer impact. I can also collaborate closely with engineers and clients across regions and have experience contributing to design discussions, code reviews, and long-term technical decisions.

I have worked across international teams in Europe, India, and the U.S., and I'm comfortable collaborating in fully remote, globally distributed environments.

Thank you for your time and consideration.

Sincerely,
Prasad Koshy Jose
