

Dear Hiring Team,

I am writing to express my interest in the Desktop Technical Specialist. I am a software professional with over 5 years of experience working on and supporting enterprise applications, cloud platforms, and secure systems, supported by a Master's degree in Computer Science from the University of Geneva, Switzerland.

In my most recent role at Oracle, I worked on enterprise-grade platforms where reliability, troubleshooting, and customer impact were critical. My responsibilities included supporting integrations, resolving technical issues, working with APIs and cloud services, and collaborating across engineering and product teams to improve system stability and usability. I regularly took on leadership and mentoring responsibilities by supporting junior engineers, reviewing code, sharing best practices, and helping teammates troubleshoot complex technical issues. I collaborated closely with product managers, architects, QA engineers, and developers to facilitate design discussions, and ensure smooth team functioning. I also promoted Agile practices through sprint planning, technical reviews, and knowledge sharing, fostering an environment focused on continuous improvement.

Earlier in my career, I gained experience across web applications, hybrid systems, and fault-tolerant environments, which strengthened my ability to diagnose problems, communicate technical concepts clearly, and work effectively under pressure.

What interests me most about technical support is the combination of problem-solving and direct customer impact. I enjoy understanding user issues, identifying root causes, and helping translate complex technical challenges into practical solutions. I believe my background in software engineering allows me to approach support issues with both technical depth and a strong focus on user experience.

I have experience collaborating with international teams across Europe, India, and the U.S., and I am comfortable working in remote and globally distributed environments.

Thank you for your time and consideration.

Sincerely,
Prasad Koshy Jose
